

nuova SIMONELLI
The coffee machines you can trust.

A NEVER-ENDING PROMISE

The coffee machine you can trust.

We're strong, determined, precise. We leave nothing to chance. Our strength is to produce coffee machines that are always technically perfect. Making them totally reliable.

You can count on a **Nuova Simonelli**.

nuova SIMONELLI
The coffee machines you can trust.

AURELIA WAVE UX

The most important added value for coffee chains: a fluid and harmonious workflow and consistent widespread quality at any time of the day.

Flexibility

Each group on the machine is independent and can be set to all the necessary parameters. Complexity and synchronization of recipes can be fully managed throughout the menu, whatever the execution (milk, coffee, filtered, tea...)

Productivity and consistency

Whoever is operating the machine, consistency of service is always ensured. Once the recipe parameters have been set, service can be provided smoothly and without complications. Steady quality and high productivityare always guaranteed.

Ease of use

High-performance technology made simple for the operator. Intuitive programming. Logic. Simple to teach. Simple to learn. Simplicity at hand expresses the ergonomic vision and design of the machine.

The workflow optimizer.

AURELIA WAVE UX

Maximum flexibility of recipe preparation.

Independent Temperature Setting.

Technology made easy and flexible to provide full customer satisfaction and consistency of service.

The new engineering focuses on a **single boiler heating system and a thermostatic mixer** with electronically heated group head, that stabilizes the temperature with low installed power and low technological complexity of a multiboiler system.

At the same time, the new **ITS technology** ensures autonomous thermal setting of each group, empowering fluid handling for the machine operator and enhancing the value of work through an amazingly full experience for customers.

Once the temperature has been set on each group, the operator's job is automated: the machine manages the rest, ensuring steady temperature right to the end of the process.

Increasing productivity. Maintaining consistency.

Whatever the intensity of service, the quality of the recipes always stays the same.

Whether it is the first or the last serve of the shift, whether it is a quiet or hyper-productive day, the consistency of service never varies.

One of the main strengths of a coffee chain is fulfilling the same promise of taste every time.

With AURELIA WAVE UX, the result is always guaranteed, whatever type of day it is.

Thanks to the new ITS technology, all the recipes in the coffee chain's menu can be set and managed with total flexibility.

Easy Cream.

Multiple milk recipes. Quickly and easily.

Absolute consistency of result is the greatest end benefit of **Easy Cream**. This technology allows multiple milk recipes to be prepared in a moment. Speed and fluidity of service. Two settings for each wand and up to two automatic milk wands mounted on the machine.

The management of milk-based recipes becomes a smooth and simply integrated operation within the service. Parameters are set only once and this drives the service towards maximum consistency and quality.

Time saving is a great end benefit too. While the Easy Cream wand is mounting the milk, the barista can grind coffee beans and brew the coffee shot to be mixed with the milk. Time saving equals higher productivity and less complexity.

An intuitive machine designed
for high shift rotation environments.

Simplicity of use and quick learning are the keys to a great result.

For coffee chains, fluidity is a must. **Immediate and intuitive programming and simplification of the setting logic** are the pillars of our technology, ensuring a satisfying experience for the operator on duty.
Also, the ergonomics of the machine guarantees smoothness of workflow.

Rapid staff training is another key point to underline. Intuitiveness is a fundamental feature of the machine, ensuring immediate learning and shorter apprenticeship.

Designed around the barista.

Matching technical performance with human satisfaction.

Optimizing the workflow means above all ensuring best results for workers, from the beginning to the end of the day.

AURELIA WAVE UX is designed with ergonomic criteria, from the push & pull arm to the Cool Touch wand, from the reverse mirror to the aligned cup warmer.
It considers ease of use and programming as well as the design of shape and spaces.

This ensures less physical stress and maximum comfort.

A new approach heading to low impact, low consumption and high revenue.

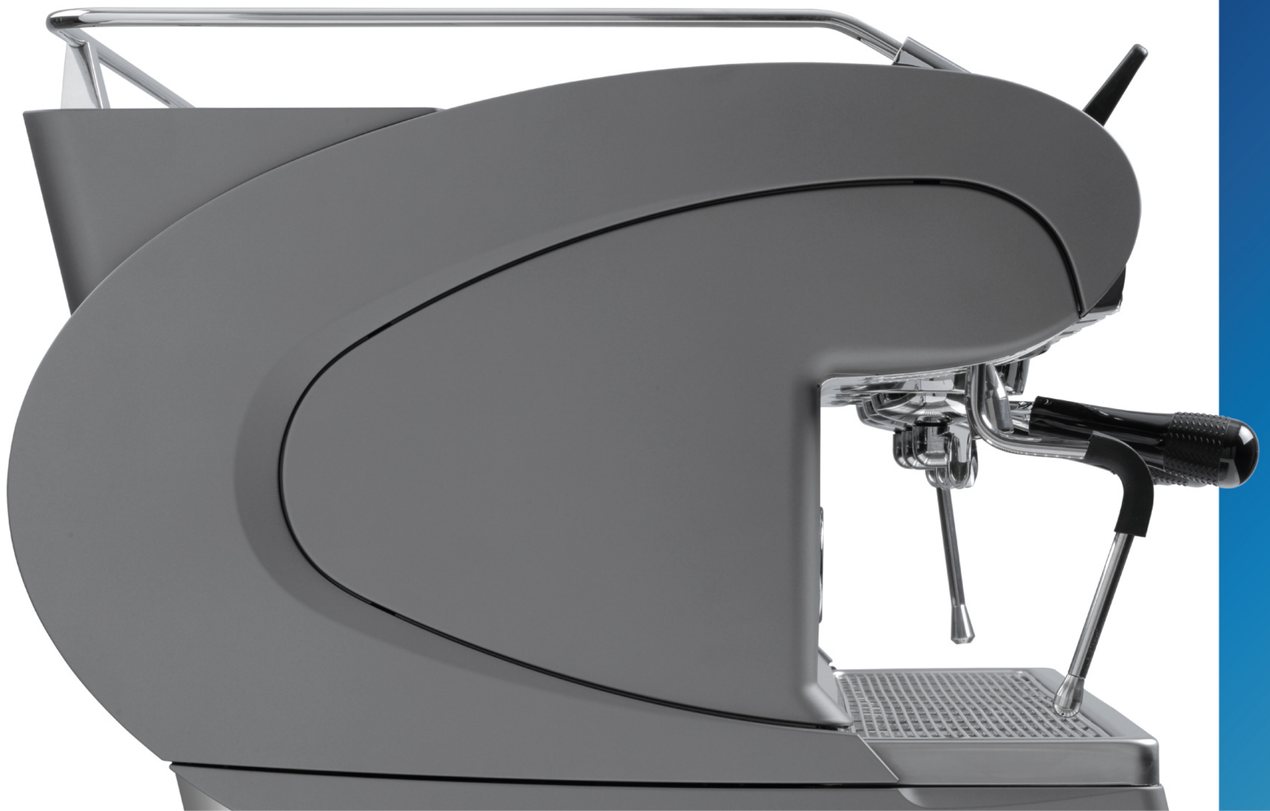

AURELIA WAVE UX is equipped with a single boiler powered with 4 – 6 kw, (depending on the 2 or 3 groups versions) while maintaining excellent temperature stability and autonomous control of each group.

Energy efficiency means low environmental impact and a step towards safeguarding the planet, ensuring service quality and versatility at the same time.

LCA* ANALYSIS:

-7% environmental impact compared to Aurelia Wave Digit

*Life Cycle Assessment is a structured and standardized method used worldwide that quantifies the potential impacts on the environment and human health associated with the use of a product, starting with respecting resources and emissions.

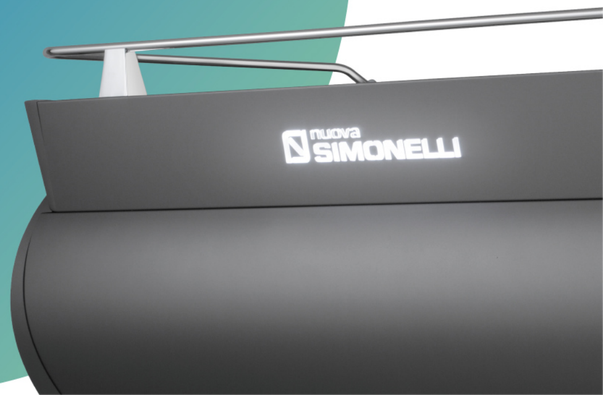

DESIGNED TO LAST AND WORK HARD

When solidity meets design.

Nuova Simonelli is famous for steadiness and robustness. The new AURELIA WAVE UX matches constructive solidity with attention to detail.

We made a bold choice of color with the new iconic Titan Grey, to more powerfully communicate the proverbial solidity of any Nuova Simonelli machine, combining aesthetic appeal with durability.

The shining and embossed logo on the back adds the final touch.

Simplified technology means greater efficiency and less maintenance.

AURELIA WAVE UX has a warm technological heart, which meets all the needs for performance and consistency.

We simplified the AURELIA WAVE UX heating system to ensure the same high performance in terms of productivity and consistency.

We've also reduced maintenance time because of its great accessibility and its longlasting components.

Perform, excel, simplify. Optimize.

AURELIA WAVE UX is the workflow optimizer.

Nothing is left to chance. Everything is designed to monitor each step of the service process and management.

Nuova Simonelli's tradition of reliability adds a new stage to the journey it is on with its clients.

Working in a coffee chain has never been so simple.

RAIL FOR CUPS

PUSH & PULL LEVERS

TOUCH SCREEN

INDEPENDENT TEMPERATURE SETTING

Once the temperature has been set on each group, the operator's work is automated: the machine manages all the rest, ensuring steady temperature right to the end of the process.

COOL TOUCH STEAM WAND

ERGONOMICS

Everything is within reach.
AURELIA WAVE LX is designed around the barista and his/her movements. And the touch screen display makes control even easier.

HOT WATER WAND

EASY CREAM

This technology allows multiple milk recipes simultaneously, speed and fluidity of service with two settings for each wand and two milk wands mounted on the machine.

REVERSE MIRROR

AURELIA WAVE LX

CONSISTENCY

Whoever is the operator on duty, consistency of service is always ensured. Once the recipe parameters have been set the service goes smoothly and without complications.

EASE OF USE

High-performance technology made simple for the operator. Intuitive programming. Logic. Simple to teach. Simple to learn.

LOWER IMPACT

A single 6kW boiler is enough to ensure legendary days of service, offering cost savings along with lower environmental impact.
