BRAVILOR BONAMAT

HOT WATER

Hot water containers

Bravilor Bonamat is synonymous with quality in the broadest sense of the word. Quality is also reflected in the HWA 8 and HWA 12 hot water containers. The double-walled containers are made of high-quality stainless steel. Optimal insulation ensures that the water stays warm for a long time and that you have quick access to boiling hot water. The orange 100°C button brings the water directly to the boiling point.

In addition, the hot water container has an ECO function which ensures that the container is only filled with 4 litres of water. Ideal for the calmer periods, so that there is never an unnecessary amount of water heated.

Handles have been provided to make it easy to fill both containers with water manually. This is the default setting. This allows you to use the containers at temporary locations, such as events. The containers can also be set to 'automatic' for a fixed water connection.

Bravilor Bonamat has designed the container in such a way that descaling and other maintenance can be carried out quickly and easily. In addition to these two HWA containers, Bravilor Bonamat offers a full range of hot water equipment. Feel free to ask about the options.

Features

- High-quality stainless steel (stainless steel 316).
- Energy-efficient, thanks to double-walled container and insulated lid.
- Clear and easy to use display, including level indication and temperature.
- Temperature adjustable from 45°C to 95°C.
- 100°C knob quickly brings water to boiling point.
- Boil-dry and over-current protection.
- Stainless steel drain valve.
- Easy-care and maintenance-friendly interior (no spiral).
- Also suitable for locations without a fixed water connection.
- The drip tray can be connected to a drain, so that the water is drained immediately.
