The taste of quality worldwide

BRAVILOR BONAMAT

Fresh filter coffee, professionally brewed with the quick filter machines of Bravilor Bonamat! The range includes various machines and allows for quickly and simply making delicious coffee at any location, with or without connection to the water mains. High-quality stainless steel combined with black accents give the machine a modern look.

Quick filter: delicious, fresh filter coffee

- Operation with LED-lighting
- Various models with or without connection to the water mains
- Coffee-is-ready signal
- Descale signal
- Stainless steel filter pan
- Self-regulating hot plates keep the coffee at the right temperature

Mondo

Quick filter machines of Bravilor Bonamat can be found everywhere. Because of its convenience, its high quality and its modern design, this line of products can be used in any location where nice, fresh filter coffee is needed. As the Mondo can be manually filled with water, it can be placed anywhere. The two self-regulating hot plates that keep the coffee at the perfect temperature, even when the container is not filled to the maximum, maintain the optimum coffee quality. The water indicator shows if the machine has been filled. The Mondo Twin doubles the capacity and can make large quantities of coffee thanks to its double brewing system. The filling opening of the Mondo is on the front side of the machine. Convenient and ergonomic!

Self-regulating hot plates that can be placed separately from the quick filter machine. The hot plates of the HP can be switched on or off individually.

QUICK FILTER

Matic

Through the connection to the water mains the Matic is automatically filled with water. The accurate water measurement guarantees the quality of the coffee. Of course, you can also make half a decanter of coffee. Through the operation with LED-lighting you can choose from a number of pre-programmed quantities. Signals indicate when the coffee is ready and when the machine needs descaling. The machines are really user-friendly because of the stainless steel filter pan and the integrated hot plates. Operation and maintenance take little time, which leaves you more time for other activities. The Matic Twin has two brewing systems and offers space for four decanters.

TH

The TH makes coffee directly in an airpot Furento or vacuum container Advanta. This allows you to serve fresh filter coffee in any location. The Bravilor Bonamat airpot Furento and the vacuum container Advanta maintain the optimum quality of the coffee for a long time. The TH has an opening for manual water filling and the THa can easily be connected to the water mains. This makes this series suitable for any location. The materials used provide the quality you may expect from Bravilor Bonamat. The quick filter machine equipment vouches a long life span with low maintenance.

The Mondo and Matic are also available in special models, for instance for use on board of ships.

The useful placeable airpot station has room for two airpots, accessories and ingredients. Ideal for a functional presentation.
