MEGA GOLD M BREWER

Coffee Queen Mega Gold brews straight into an elegant 2.5 litre serving station (thermos) with tap and level indicator tube. Since no external heat is supplied, the coffee retains its excellent taste and aroma for a long time.

The serving station fits into all possible environments, and is quick and easy to handle. Lift the serving station off the brewer and put it wherever you want to serve the coffee. You can also use specially design display covers for the serving stations, for easy indication of the coffee that is served. Simple and really neat!
