INTRODUCING THE NEW MXG RANGE

GOURMET ICE GOES EXTREME

EXTREME: the new gourmet MXG range

Scotsman Ice Systems

Since the very beginning when Scotsman invented the spray system - today highly recognized by the industry as the ultimate solution for producing singularly formed cubes - we have constantly and through the years developed the glorious GOURMET ice.

Leveraging on the tradition, today we have gone further ahead to meet future requirements, designing, developing and manufacturing the natural heir to the long-time celebrated MC range: the MXG.

Individual transparent solid cubes.

Thanks to the only true Scotsman spray-system, each single cube is an artwork itself: crystal clear and perfectly shaped, faithful to the Scotsman tradition.

Available three-sized cubes:

Medium Gourmet, 20 grams
Large Gourmet, 39 grams
Small Gourmet , 8 grams,

MXG: the complete range

HIGH PRODUCTION

Scotsman Ice Systems

Enhanced evaporator

Frontally, easily accessed evaporator

Extractable, frontal air filter

Powered condenser

Redesigned ice chute

Scotsman Ice Systems

EXTREMELY productive

Enhanced evaporating surface

Powered condenser's fans

Electronic controls

EXTREMELY appealing

No visible screws or bolts

New appealing aesthetics

Global standard footprint

On/off switch front push-button

External indicator lights

Front access evaporator

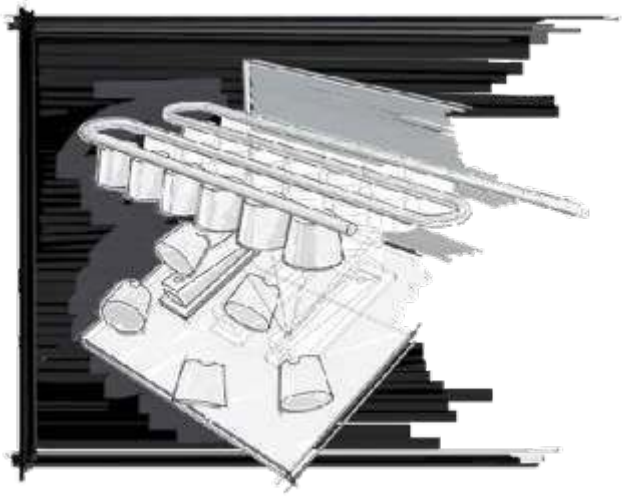

Front access condenser air filter

EXTREMELY friendly

Curved-designed ice chute for a quieter operation

Enhanced evaporating surface

More efficient heat exchange, giving better and more reliable performance in harsh environment conditions.
Reduces energy consumptions.

Powered condenser's fans

Stronger fans with larger blades and more powerful fans provide better air circulation and a better micro-climate for the condensing unit, all resulting in a longer life of the equipment and extremely high performance, also in unfriendly working conditions.

Electronic controls

Ambient and water temperatures may change throughout the year but your ice will stay the same.
The ice maker automatically adjusts to changing working and environmental conditions, eliminating the trouble of periodical regulations or annoyingly lower performances.

External Indicator Lights

Keeps ice maker's operations under constant surveillance.

On/Off Push Button

Although normally equipped with the automatic bin- full & emergency stop infrared sensor, the MXG line comes also supplied with a frontal, green-lit, on/off push button for a manual intervention by the operator, when required.

Front Access Evaporator

Repositioning the evaporator has led to easier and more friendly cleaning operations

Front Extractable Air Filter

Protects the condenser from dirt and powders normally present even in the supposedly cleanest environments; with a do-it-yourself, once-in-a-while cleaning operation, you will save time and money and let your ice maker perform without stress and live longer.

Global Standard Footprint

22" and 30" footprint.
Strictly follows international imperial standard commonly adopted in the industry of reference.
The backside extra space allows for a comfortable wall-adhered installation.

New Appealing Aesthetics

No more will the ice maker need to be hidden somewhere in the backside of your kitchen; with the completely redefined design, you will be proud of showing your gourmet ice maker as a piece of technological art.

The benefits: eXtremely competitive

Scotsman Ice Systems

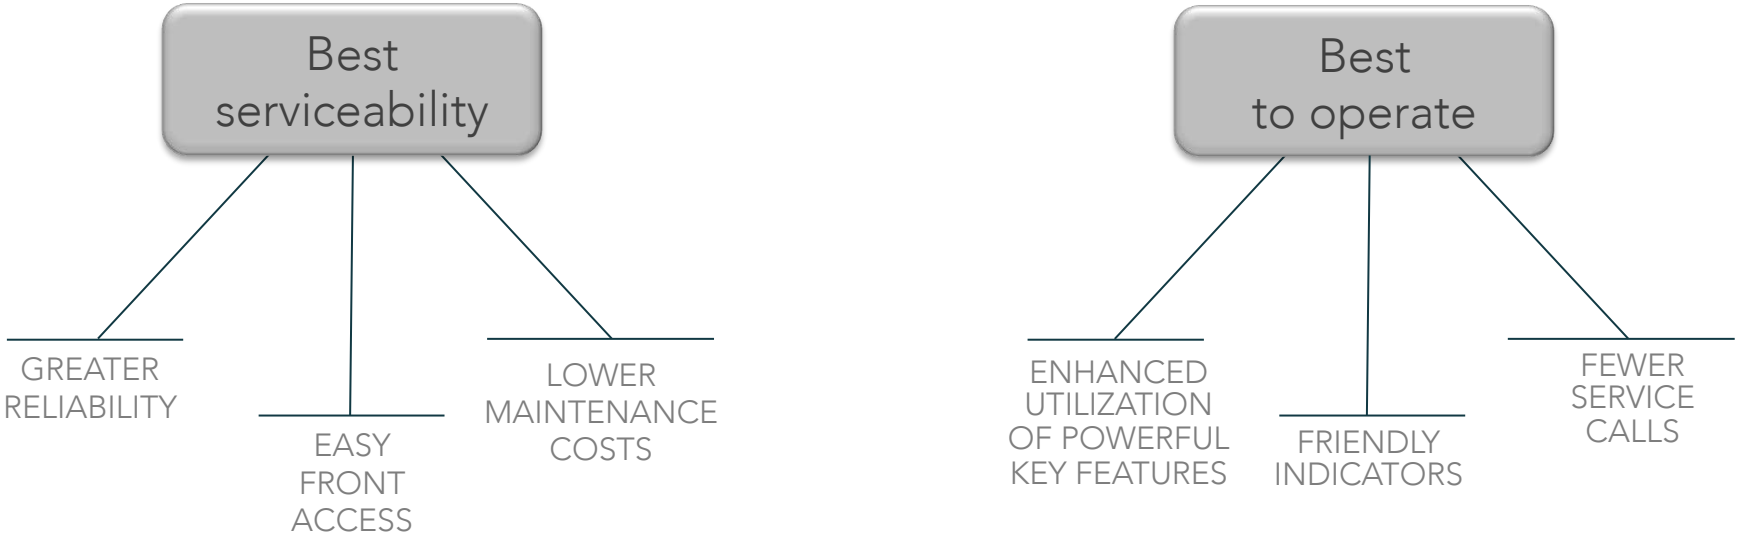

The benefits: eXtremely marketable
