BRAVILOR BONAMAT

ACCESSORIES

Fully enjoy your cup of coffee

Preheat your porcelain espresso cups and cappuccino mugs in the WHK cup heater of Bravilor Bonamat to fully enjoy your coffee. It has been recommended by professionals —especially coffee shop owners— for many years. Not only does your hot beverage remain warm for a longer period of time, but also the natural flavours remain intact. You will notice the difference!

The convenient WHK unit features three heating layers. Each layer can be switched on and off separately.

Espresso at its best

The effect on preheated espresso cups is remarkable as espresso is more sensitive than brewed coffee. Espresso is more concentrated and served in a smaller volume. Whenever there is a variance in temperature it has a negative effect on the taste. Therefore Bravilor Bonamat highly recommends the WHK cup heater as accessory to the Esprecious espresso machine.

Tip! A warm cup of espresso will also retain the crema layer longer.

Specifications	WHK cup heater
Capacity	approx. 120 espresso cups
Rated power	230V~ 50/60Hz 85W
Dimensions (wxdxh)	349x400x542 mm
