BRAVILOR BONAMAT

Our pride and joy: Sprso

If you are looking for the simplicity of a consumer machine and the performance of a professional coffee-maker, Sprso is what you'll need.

The Sprso is small, powerful and stylish.

This eye-catching bean-to-cup machine serves perfect single cups of ristretto, espresso, crema coffee and americano. A milk cooler option offers you the additional facility to create delicious cappuccinos and lattes topped off with freshly frothed milk.

The Sprso is perfectly suited for board rooms, waiting rooms and small offices. The coffee-maker is even right at home on the kitchen counter thanks to its compact size.

Sprso meets expectations

- Makes a perfect espresso from freshly ground beans
- Offers many coffee specialties; and even more with the optional milk cooler
- Brews two coffees simultaneously (ristretto, espresso and crema coffee)
- Looks stunning thanks to its unique design
- Simple and intuitive interface
- Coffee strength, intensity, grind size and cup size can be adjusted according to your wishes
- Made from sturdy high quality materials: stainless steel and BPA-free plastics
- Transparent bean canister makes refilling easy
- Incorporates the professional CIRCO brewer
- Removable water tank for manual water fill
- Extremely low energy consumption in standby < 0.5W thanks to the flash heater

Synonymous with simplicity

The simplicity is reflected in the intuitive operation. The Sprso is designed so that every action feels logical and natural.

The whole experience is self-explanatory: select a coffee specialty from the range of options and choose the desired cup size. The brew strength, intensity and grind size can also be adjusted to your individual preference.

Don't confuse simplicity with a lack of options: every user can optimise his or her cup of coffee to taste via the eye-catching screen.

Bravilor Bonamat has programmed the beverages with great care (based on our decades of experience) so customers can simply enjoy delicious coffees. We created three main beverage profiles to choose from. The profiles vary in volume size and coffee strengths. In addition employees can create three 'design your own' coffees meeting their individual preference.

Ready right out of the box

The Sprso can be unpacked, plugged in and ready for use in only 10 minutes. It doesn't get any simpler than that.

BRAVILOR BONAMAT

CIRCO brewer

In designing the Sprso fully automatic espresso maker, Bravilor Bonamat considered every last detail. Intended to be as compact as possible.

The CIRCO brewer is one of those details. This brewer has been developed and engineered by Bravilor Bonamat in response to the increasing demand for bean-to-cup vending machines. The unique compact round shape of the brewer allows us to keep the professional espresso machines small.

Pressure is essential for intense flavours. The CIRCO brewer ensures the correct pressure to get the most out of your freshly ground beans. The unique pump control of the brewer guarantees a constant extraction time.

NSF certified

The CIRCO brewer is NSF certified, meaning that it meets public health and environmental safety standards.

This certification recognises how easy it is to remove, dismantle and clean the CIRCO brewer, thereby greatly simplifying maintenance. The automatic rinsing programme of the machine ensures that the high in-cup quality is always maintained.

Proven technology

- Creates a delicious crema layer
- Constant the best coffee quality
- Compact round shape; takes up little space
- Made from high quality materials ensuring its accuracy and reliability
- NSF certified
- Patented by Bravilor Bonamat
- Easily removed, dismantled, cleaned and replaced
- Capacity for 6 to 18 grams of ground coffee

Overall, uncomplicated for users enhancing professional technology.

CIRCO
brewer

In-house innovation

The Sprso contains the CIRCO brewer greatly simplifying maintenance.

Sprso milk cooler

To enjoy various specialty coffees made with fresh milk you need a milk cooler.

The Sprso milk cooler that has been selected meets the high Bravilor Bonamat standards and has been thoroughly tested.

The appliance is a compact table top device. It keeps milk cool at a temperature of +1 °C to +7 °C (depending on the ambient temperature).

The automatic flush ensures that the in-cup quality remains high time after time.

Optional water filter

Bravilor Bonamat recommends the use of a water filter. This improves the quality of your coffee specialties (aroma and taste).

In addition it decreases lime scale, herewith optimising the overall operation and lifespan of the Sprso.

The water tank of the Sprso has been optimised for the BRITA AquaAroma Crema water filter.

Technical specifications	
Capacity: bean canister | water tank	300 grs | 2.2 litres
Rated power	230V~ 50Hz 1978W
