Testing was performed in accordance with DIN 18879-1, Regulation (EC) No. 1935/2004 and Regulation (EU) Nr. 10/2011, including changes. For elastomers, plastics and lubricants, the tests were performed on the basis of the KTW recommendation 1.3.13 from the German health authority, the testing guideline for organic materials (KTW) and the lubricant guideline from the Federal Environment Agency. Ion exchange resins used were inspected based on the Resolution of the European Council ResAP (2004) 3 and the activated charcoal was tested in accordance with DIN EN 12915-1 (tables 1 and 2) and DIN EN 12902.

Result:

Regarding the parameters tested the aforementioned water filter system complies with the requirements of LFGB. Thus it can be stated that the products PURITY Quell ST 450, PURITY Quell ST 600, PURITY Quell ST 1200, PURITY Finest 600 and PURITY Finest 1200 are considered suitable for appropriate use in the filtration of water.

The test results refer exclusively to the units under test.

The basis for this certificate is our test report BRITA 26/13 dated 24/07/2013.

This statement is applicable as long as the foreseeable contact conditions have not been altered negatively in terms of the test conditions and the materials meet the qualities tested. The validity of this document expires in the event of changes to legal regulations or at the latest four years after the date of issue. This is only applicable as long as the individual certificates mentioned in test report BRITA 26/13 are still within the period of validity of this document or are renewed accordingly.
