NATURAL REFRIGERANT R290

Key Features

The IM-21CNE-HC is a compact sized cube ice maker, which utilises Natural Refrigerant R290.

- Energy efficient, with savings of 16% compared to HFC equivalent model.*
- ✔ Smallest member of the Emerald Class, Hoshizaki's new range of climate friendly ice makers.
- ✔ Can produce up to 25 kg of cube ice per 24 hours (AT.10°C.WT.10°C).
- ✔ Unique ice making system that has an automatic rinse cycle. After every new batch of ice, the water reservoir drains and refills with fresh water. System comes with a magnetic water pump that has no direct coupling, which prevents any leakage.
- ✔ Closed water circuit offers the ultimate contamination protection, by reducing the number of points at which impurities can enter the ice making process.
- ✔ Electronically controlled to ensure an optimised ice making process under varying circumstances without the need for physical adjustments. Quality of ice is always consistent.
- ✔ Easily cleanable air filter allows end-users to carry out routine cleaning schedules. Extends product life expectancy and reduces the frequency and costs of maintenance call-outs.
- ✔ Stainless steel exterior with integrated door handles provides a hygienic and high quality finish.
